Exercise 3: Build the UI

Build a ReasonReact-UI for Black Jack.

Option 1: Continue from Exercise 2

- Use your Result from *Exercise* 2
- Download and use
  https://github.com/marcoemrich/reasonreact_blackjack/blob/exercise_model/src/ExampleStyles.re

Option 2: Start again from Repo

- git clone git@github.com:marcoemrich/reasonreact_blackjack.git
- git checkout exercise_react

Both Options

Build *Components/Components_Card.re* for this HTML-Example:

```html
<div className="card">
  <div className="card-text"><span style="color: red">♥ 10</span></div>
</div>
```

Extend BlackJack-Component
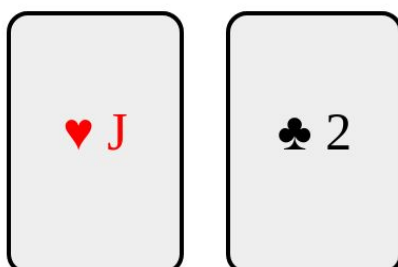

```
▼<body>
  ▼<div> == $0
    <div>Cards in Deck: 5</div>
    <br>
    <div>Score: 12</div>
    <br>
    ▼<div class="hand">
      ▼<div class="card">
        ▼<div class="card-text">
          <span style="color: red;">♥ J</span>
        </div>
      </div>
      ▼<div class="card">
        ▼<div class="card-text">
          <span style="color: black;">♣ 2</span>
        </div>
      </div>
    </div>
    <br>
    <button>deal 1</button>
  </div>
```

Goal

Cards in Deck: 5

Score: 12

deal 1
